Purpose

Web Upload provides server to server functionality through Secure File Transfer Protocol (SFTP). This functionality allows transmissions of multiple tax returns and their payments. This document addresses forms supported by the Virginia Department of Taxation (Virginia Tax) and provides the tax return details for the following forms:

Withholding Tax

- VA-5 Monthly/Quarterly Withholding Return
- VA-15 Semi-Weekly Withholding Return
- VA-16 Quarterly Withholding Reconciliation
- VA-6 Annual Withholding Reconciliation

Income Tax Statements

NOTE: This SFTP guide provides details for the server-to-server functionality <u>only</u>. Review the <u>Web Upload W-2 and</u> <u>1099 Guide</u> for details on formatting your files per the SSA's EFW2 guidelines and the IRS's Publication 1220.W-2 Wage and Tax Statement

- W-2C Corrected Wage and Tax Statement
- 1099-R Distributions from Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.
- 1099-MISC Miscellaneous Income Form
- 1099-R Distribution Form
- 1099-NEC Non-employee Compensation Form
- 1099-K Payment Card and Third Party Network Transactions

A W-2C format has been added to correct/amend W-2 information. All wage and withholding amount corrections as well as SSN corrections must be sent using the W-2C File layout. You may NOT send a second W-2 file to correct information as has been done in the past. If you send a second file W-2 file attempting to correct information, the file will be treated as a second (additional) W-2. When using the W-2C file layout, you must include the initial information and the information that you are correcting.

- As an exception to utilizing the W-2C file layout and as a convenience to employers, if you are correcting FEIN's or a tax year you must send an email to <u>Webupload@tax.virginia.gov</u>. Please DO NOT send any confidential information in the initial email. The Web Upload administrator will respond to your email with a secure email. Please respond to this secure email with the information that needs to be updated (FEIN or tax year).
- 1099 Correction Process: The 1099 Correction process will remain the same. If you need to correct / amend your 1099 Web Upload data a new file/submission is required. If you need to correct an amount in your 1099 file, adjust the incorrect amount in your file and reload the file to Web Upload. Please only resubmit the item on the file that needs to be corrected. The second file received will be treated as "corrected" in the Virginia Tax records (for 1099's only).
- If you are correcting an SSN, FEIN or tax year in the 1099 file, you must send an email to <u>Webupload@tax.virginia.gov</u>. Please DO NOT send any confidential information in the initial email. The Web Upload administrator will respond to your email with a secure email. Please respond to this secure email with the information that needs to be updated (FEIN/SSN or tax year). If you still have questions, email the <u>Web Upload Help Desk</u> so they may advise you / contact you.

Sales Tax -New for 2025

Starting with your April 2025 returns (due May 20 for monthly filers and July 21 for quarterly filers), the way you file sales taxes in Web Upload will change. You'll need to create a file that utilizes the new ST-1 specifications (see page 15). The ST-1 is a consolidated form that will replace the ST-8 and ST-9 file layouts. You'll also be able to use Web Upload for more sales tax types, the ST-6 and ST-7, with this change. No account number registration information will change. File a separate ST-1 return for each account number, as applicable.

• ST-1 Virginia Sales and Use Tax Return (for filing periods April 2025 and beyond)

Other Sales tax file layouts may only be used for filing periods prior to April 2025. If filing information for a prior period, you must select the appropriate filing layout.

File Layout specifications used filing periods February 1, 2020, to March 31, 2025

- Use-2020
- Sales-2020
- Sales-2020-MultipleLocalities

File Layout specifications used filing periods prior to February 1, 2020

- ST-8 2018 Out of State Use Tax Return
- ST-9 2018 Sales and Use Tax Return (Multiple Localities)
- ST-9 2018 Sales and Use Tax Return (Single Locality)
- Revised ST-8 Out of State Use Tax Return Use
- Revised ST-9 Sales and Use Tax Return (Multiple Localities)
- Revised ST-9 Sales and Use Tax Return (Single Locality)

Schedule VK-1 – Owner's Share of Income and Virginia Modifications and Credits

P2P – Peer-to-Peer Vehicle Sharing Tax Return

The above returns can only be submitted for customers that are registered with us for that tax type. Returns submitted for unregistered accounts <u>cannot</u> be processed.

The Department does not, at present, support International ACH (IAT) Debit transactions. See the <u>Electronic Payment</u> <u>Guide</u> for additional information.

Questions and Support

If you have questions / need additional information regarding <u>Web Upload</u>, contact the Web Upload SFTP Business Administrators at <u>webupload@tax.virginia.gov</u>. Do NOT include account specific information in the e-mail.

For tax type specific information, see our website <u>www.tax.virginia.gov</u>.

Signing Up for SFTP

In order to sign up for SFTP, you must first sign up for Web Upload. Marking the "Server to Server Processing" checkbox located on the Web Upload Sign Up page will initiate the SFTP sign up process. You must provide your external IP Address after marking the "Server to Server Processing" check box.

Information required when signing up for Web Upload: First Name, Last Name, Email Address, PTIN/FEIN/SSN, Role, Company Name, Phone Number and Password.

Existing Web Upload Users – Mark the "Server to Server Processing" check box located on your My Profile page and provide your external IP Address.

The Web Upload Administrator will contact you about your Server to Server set up request. You will be required to complete a Memorandum of Agreement (MOA). Once the MOA is received, your set up can be completed. This process takes approximately 2 – 3 weeks. Once your access is complete, you will receive a call from a Web Upload SFTP Business Administrator to provide you with your SFTP password information.

Testing

You may test your system with SFTP prior to sending live data, but you are not required to do so. If you decide to test, you must use the SFTP Test ID provided in the SFTP Confirmation Email. Once you submit a test file, contact the Web Upload SFTP Business Administrators at <u>webupload@TAX.virginia.gov</u>. You will receive a "results" file for each test file you submit. See **Results Files** for additional details.

File Formatting

Files must be submitted in either a Positional or Delimited (with *tab* field delimiter) format. However, the W2, 1099MISC and 1099R files must be submitted in the Positional format <u>only</u>.

- "P" must be designated in the file name to identify the file format as "positional".
- "D" must be designated in the file name to identify the file format as "delimited".

File Naming Convention

Web Upload uses the file naming convention to determine form type and the format of your file (delimited vs. positional) and processes it accordingly. You must include this information in this order when naming a file.

- Company Name
- File Number Counter (Required when sending multiple files in the same day)
- Underscore (_)
- Return type in file: VA5, VA15, VA16, VA6, ST-1, RevisedST9MultipleLocalities, RevisedST9SingleLocality, RevisedST8, VK1, W2, W2C,1099MISC or 1099R. Beginning Feb 1, 2020, the following return types must be included in the file name for all sales tax submissions: Use-2020, Sales-2020, Sales-2020-MultipleLocalities and P2P-2020.
- Underscore (_)
- Date file uploaded (MMDDYY)
- Underscore (_)
- File format

0

- P = Positional files
- D = Delimited files

Example: PretendTaxShop_ST-1_052025_P

NOTE: As displayed in the example above, there should be no spaces in the "Company Name" when naming files.

Remember – If you submit more than one file in a day, you MUST modify the "Company Name" by adding a "File Number Counter" to it to identify the new file as a separate file. Otherwise, the risk of overwriting files of the same name may occur.

Example: PretendTaxShop1_ST-1_052025_P PretendTaxShop2_ST-1_052025_P PretendTaxShop3_ST-1_052025_P

File Format Requirements

General File Information

- Do NOT encrypt your file or the entire file will be rejected. The SFTP channel will be encrypted.
- Ensure your file is not empty.
- Ensure your file contains a valid form type: VA5, VA15, VA16, VA6, ST-1, RevisedST9MultipleLocalities, RevisedST9SingleLocality, RevisedST8, Use-2020, Sales-2020 and Sales-2020-MultipleLocalities, VK1, W2, W2C, 1099MISC, 1099R or P2P- 2020.
- No header or footer records are allowed in your file.
- Web Upload will "ignore" (i.e. not process) any records with errors. These records must be corrected and resubmitted.

Sales Tax and Withholding Tax Return Information

- Even when no tax due is due (i.e. "zero due" return) you must file that return. Enter all zeroes (0.00) for "zero due" returns.
- All returns, including "zero due" returns, must contain all required fields.

Sales Tax and Withholding Tax Payment Information

- Enter dollar, cents and decimal points for all payment amounts.
- Do NOT enter dollar signs.
- Each record with a payment must contain its own payment and banking information.
- If a payment is not being made for a record, enter "0.00" in the payment amount field. For the number/routing number fields: blank fill for positional and leave the field empty for delimited.

File Directory

When you submit your file, use the Directory Folder named "Dropoff".

Batch jobs are scheduled to run every 30 minutes to retrieve and process the submitted file. This schedule applies to files submitted via the SFTP Live ID.

When submitting files using the Test ID, email the Web Upload SFTP Business Administrators (<u>webupload@tax.virginia.gov</u>), as this part of the testing process is not automated. They will have the file processed and let you know when Results Files are ready.

Results Files

A "Results" file will be provided for each file submitted. Retrieve the "results" file from the Directory Folder named "Pickup". You are also responsible for deleting that file from that Directory Folder. This applies to files submitted with the Live ID and with the Test ID.

The word "Results" will be displayed in front of the file name you submitted. The example on Page 5 would display as *ResultsPretendTaxShop_VA5_052225_P*.

Each return record entry in the file will have a reference number associated to it. You have two options when choosing the reference number for the "Submission ID" field, which is the last field for every entry.

Your first option is the Line Number for each return record entry. You must leave the field empty for delimited formatted files and blank fill for positional files. Example: Line $1 = 1^{st}$ record, Line $2 = 2^{nd}$ record, etc.

Your second option is to provide an 11-digit number for each return record entry. You determine what the 11-digit number will be in the field. Example: 10000000015, 45645645645, etc.

If a record was processed by Web Upload, "Processed" will be followed by the Line Number or 11-digit Submission ID. This means that the record in the file passed Web Upload validation edits and no errors were found.

If a record was <u>not</u> processed (i.e. did not pass Web Upload validation edits), an error message will follow the Line Number or Submission ID.

Remember, these records <u>must</u> be corrected and resubmitted.

Example <u>without</u> Submission ID number File Processed: true File Name: PretendTaxShop VA5 052221 P

> VALIDATION Processed Line 1 Processed Line 2 Processed Line 3 Line 4: FEIN: 12-34568 is not a valid FEIN Processed Line 5

Example <u>with</u> Submission ID number File Processed: true File Name: PretendTaxShop_VA5_052221_P

> VALIDATION Processed 11111111111 1111111112: FIPS Code is required Processed 11111111113 Processed 11111111114 Processed 1111111115

If the "File Processed" section displays "false", none of the records in the file were processed through Web Upload and none will post to your customers' accounts. One example is when a Delimited file is named with the "P" to indicate a Positional file.

The <u>Appendix</u> of this document contains possible error messages.

NOTE: For Test files, the first line in the "results" file will be "TEST File Processed" with true or false. The rest of the "results" file will be formatted like the examples above.

Form ST-1 Virginia Sales and Use Tax Return "ST-1"

The Form ST-1 should be used for all tax type 10, 12 and 14 filings. Starting with your April 2025 returns (due May 20 for monthly filers and July 21 for quarterly filers), the way you file sales taxes in Web Upload will change. The ST-1 is a consolidated form that will replace the ST-8 and ST-9 file layouts. Web Upload will also be able to be utilized for more sales tax types, the ST-6 and ST-7, with this change. No account number registration information will change. File a separate ST-1 return for each account number, as applicable.

APPENDIX – Web Upload Error Messages

Web Upload validates your file using the following rules and provides an error message if information cannot be validated. If you include a Submission ID as the last field, it will replace the "Line {0}" as referenced below.

Errors when a field is missing or required:

Line {0}: {1} is required

Error message displayed when information is not provided in a required field. Example, Name is required, FIPS Code is required, Local Tax is required, etc.

Line {0}: You may not report Historic Triangle Taxable or Tax amounts for periods prior to July 2018 Applies when historic triangle amounts greater than \$0 are reported for periods prior to July 2018

Line {0}: {1}: {2} is not a valid {3}

Error message displayed when information provided is not in a valid format. Example: Alpha characters provided in a field specified as numeric.

Line {0}: A {1} schedule is required for this form

Error message provided when a required schedule is not attached. This would apply only to sales tax returns.

Line {0}: A {1} form Error message provided when a required schedule is not attached. This would apply only to sales tax returns.

Errors when a line does not have the correct number of fields:

Line {0}: Incorrect length (Read {1}, Expected {2} characters)

Error message provided in for an incorrect field length. Program expects 2 characters, user supplies one character.

Line {0}: Incorrect length (Read {1}, Expected {2} or {3} characters) Error message provided for an incorrect field length. Program expects 2 or 3 characters, user supplies one character.

Line {0}: Does not contain the expected number of fields (Read {1}, Expected {2}) Error message provided for an incorrect number of fields. Program expects 2 fields, user provides 1 field.

Line {0}: Does not contain the expected number of fields (Read {1}, Expected {2} or {3}) *Error message provided for incorrect number of fields. Program expects 2 or 3, user provides one field.*

Errors related to conditional logic:

Line {0}: State General Taxable Amount must be greater than \$0 since State General Tax is greater than \$0 – Applies to sales tax
