Application for Green Jobs Creation Tax Credit Instructions

General Information

For taxable years beginning on and after January 1, 2010, but before January 1, 2018, a \$500 income tax credit is allowed for the creation of “green” jobs paying an annual salary in excess of \$50,000. Each taxpayer is allowed a credit for up to 350 new green jobs. In order to qualify for the tax credits, the taxpayer must have created the green job and filled it during the taxable year in which the credit is claimed. The credit is allowed for the taxable year in which the job has been filled for at least 1 year and for each of the 4 succeeding taxable years provided that the job is continuously filled during the respective taxable year. Any unused tax credits may be carried over for 5 taxable years.

In order to qualify for the tax credit, the taxpayer must demonstrate that the green job was created by the taxpayer and the job was filled for the taxable year in which the credit is claimed.

“Green job” means employment in industries relating to the field of renewable, alternative energies, including the manufacture and operation of products used to generate electricity and other forms of energy from alternative sources that include hydrogen and fuel cell technology, landfill gas, geothermal heating systems, solar heating systems, hydropower systems, wind systems, and biomass and biofuel systems. The Secretary of Commerce and Trade is required to develop a detailed definition and list of jobs that qualify for the credit. This information is available on the Secretary of Commerce and Trade’s website at www.commerce.virginia.gov/initiatives/green-job-tax-credit.

“Job” means employment of an indefinite duration of an individual whose primary work activity is related directly to the field of renewable, alternative energies and for which the standard fringe benefits are paid by the taxpayer, requiring a minimum of either (i) 35 hours of an employee’s time per week for the entire normal year of such taxpayer’s operations, which “normal year” must consist of at least 48 weeks, or (ii) 1,680 hours per year. Positions created when a job function is shifted from an existing location in the Commonwealth do not qualify as a job.

Any credits granted to a partnership, limited liability company, or electing small business corporation (S corporation) must be allocated to the individual partners, members, or shareholders, respectively, in proportion to their ownership or interest in such business entities.

If the taxpayer is eligible for the Green Jobs Creation Tax Credit and creates green jobs in an enterprise zone, the taxpayer may also qualify for the benefits under the Enterprise Zone Grant Program.
